

## Improvements to e-Suitability - paragraph library version 1.4.6 26.5.2016

We are pleased to announce amendments to e-Suitability which take into account budget and other changes applicable to the new tax year.

The most significant changes are:

- Fix to text for DSS mortgage interest support
- Minor layout corrections

### Fix to text for DSS mortgage interest support text

Under the insurance arrangements heading for all mortgage suitability reports is text which outlines the extent of Social Security support to cover mortgage interest which may be expected in the event of unemployment. The minimum period of unemployment necessary for mortgage interest to be covered by the DSS has increased from 13 weeks to 39 weeks with effect from 6.4.2016. An example of the new text to explain this follows:

*I have discussed the consequences of not having sufficient protection in the event of accident, sickness or unemployment. Under current DSS rules last amended in April 2016, you may not be eligible for any mortgage interest support for the first 39 weeks of unemployment.*

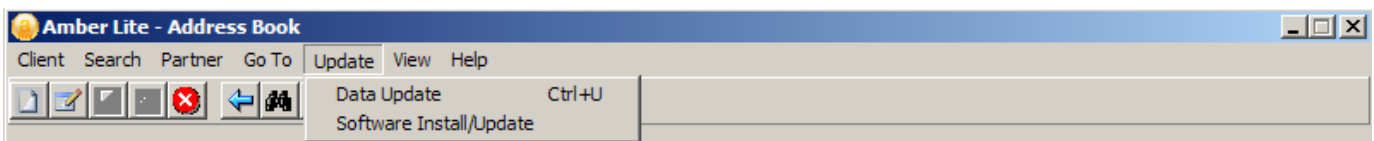

### Minor layout corrections

The paragraph library has been reviewed and a number of small layout corrections have been made. In this connection, we are grateful for continued user feedback on any flaws found in the content, the correction of which will take precedence over all other development work.

### New paragraph library

#### Amber Lite

If you have not already updated the software, select the "Data Update" option from the drop down menu which is accessible immediately after launching Report Writer.

Then follow the onscreen instructions.

## Adviser Office

If you have not already updated the software, select the “e-Suitability data update” option from the drop down menu which is accessible immediately after launching Report Writer.
